

WPL 18 E

AIR SOURCE HEAT PUMPS

PRODUCT-NO.: 227757

Experience a strong performance on any terrain

One of the most versatile models of all our air source heat pumps, it has plenty to offer – almost regardless of which building you need it to supply efficiently with heat. Even at outside temperatures of -20 °C, this heat pump achieves high flow temperatures and is therefore also ideally suited to installation in a modernised older building.

Highly flexible and universally applicable

If you need to supply a larger building or smaller commercial units, you have the option to connect several appliances and thereby increase the output.

WPL 13 E

Product-No.: 227756

The main features

Air source heat pump installed indoors or outdoors for heating

Ideally suited to modernisation

High output and excellent COP even at low outside temperatures

Cost savings through efficient heat pump defrosting
